MOVABLE EXTRACTOR ARMS

Movable extraction arms are an excellent accessory for extraction systems, bringing the suction power directly to the source of dust and fumes. The process is thereby not interrupted. Repositioning to a new exhaust point quickly and reliably is possible with a single motion. The stable frame, controls and hinges are all externally located to prevent contamination or obstruction of the airflow. Adjustments are feasible without additional labor or downtime.

TECHNICAL DATA

Oval exhaust hoods for a connection diameter 80 mm up to 160 mm. Depending on the diameter, the total length of the arms can be up to 6 m.
